PROFILE SUMMARY

Java Backend Developer with hands-on experience building AI-powered and enterprise backend applications using Java, Spring Boot, Spring AI, Spring Security, REST APIs, PostgreSQL, MongoDB, Docker, and JWT Authentication. Experienced in designing scalable backend architectures, integrating AI services, securing APIs, and deploying production-ready applications.

EXPERIENCE

Software Developer Trainee | QSpiders - Robowave (Dec 2024 – June 2025)

- Developed backend applications using Java, Spring Boot, SQL, and REST APIs.
- Implemented authentication, validations, structured API responses, and layered architecture.
- Worked with SQL queries, database integration, Postman testing, and backend debugging.

PROJECTS

ShivMai AI TestPilot (Java 21, Spring Boot 4, Spring AI, OpenAI, REST APIs, Docker)

- Developed an AI-powered backend assistant that generates API test cases, explains JSON payloads, debugs REST APIs, creates SQL validation queries, and produces Postman requests.
- Designed a modular Spring Boot architecture integrating Spring AI with OpenAI using validation, exception handling, clean layered architecture, and scalable service design.

ShivMai OTP Infrastructure Service (Spring Boot, Spring Security, JWT, MySQL, REST APIs)

- Developed a reusable OTP authentication platform supporting secure OTP generation, expiry validation, retry protection, JWT authentication, and email verification.
- Implemented layered architecture, secured REST endpoints, and production-oriented backend workflows.

NASA APOD Vault (Spring Boot, Spring Security, PostgreSQL, Docker, HTML, CSS, JavaScript)

- Built and deployed a full-stack NASA APOD application with secured REST APIs and JWT authentication.
- Integrated PostgreSQL, Docker, Render, and Cloudflare while resolving production deployment, CORS, routing, and database configuration issues.

EmerGuard – Roadway Assistance Application (Spring Boot, MongoDB, REST APIs)

- Developed backend services for SOS requests, emergency workflows, authentication, and request management.
- Implemented validation handling, structured API responses, and MongoDB integration.

NVIDIA Fibernet Billing Dashboard (Core Java, Swing, JDBC, MySQL)

- Developed a billing management system supporting CRUD operations, invoice generation, and validation workflows.
- Designed SQL queries and optimized billing data processing using JDBC.

SKILLS

Backend & Programming: Java, Spring Boot, Spring Security, Spring AI, REST APIs, JDBC, Hibernate

Database: MySQL, SQL, PostgreSQL

Frontend: HTML, CSS, JavaScript

Tools: Git, GitHub, Maven, Docker, Postman, Swagger, Render, CloudFlare

Concepts: OOP, Collections, Exception Handling, JWT Authentication, Layered Architecture

EDUCATION

- **Bachelor of Computer Engineering |RMCET, Devrukh (2024) | CGPA 8.17 | 72.12%**

CERTIFICATIONS

- **Java Full Stack Development – QSpiders**
- **Spring Boot & REST API Development – QSpiders**
- **SQL & Database Programming – QSpiders**
